AMENDMENT TO THE CLAIMS

1. (Currently Amended) A method for ~~prophylaxis or treatment of treating~~ an inflammatory condition, said method comprising the steps of:

providing a patient having an inflammatory condition; and
administering to said patient a therapeutically effective amount of a composition comprising cyclic adenosine diphosphate ribose (CADPR), or a functional analogue or derivative thereof, in a form that is accessible to a receptor molecule, conveyed in a pharmaceutically acceptable carrier vehicle, wherein said composition reduces the degree of said inflammatory condition in said patient.

2. (Original) The method of claim 1, wherein said inflammatory condition is selected from the group consisting of intestinal epithelial inflammation, endotoxemia, sepsis, hemorrhagic shock and pancreatitis.

3. (Original) The method of claim 2, wherein said intestinal epithelial inflammation is Crohn's disease or ulcerative colitis.

4. (Original) The method of claim 1, wherein said composition is administered to said patient enterally.

5. (Original) The method of claim 4, wherein said composition is administered using an enteric-coated formulation.

6. (Original) The method of claim 1, wherein said composition is administered to said patient systemically.

7. (Cancelled)

8. (Previously Presented) The method of claim 1, wherein said functional analogue or derivative of cyclic adenosine diphosphate ribose (cADPR) is selected from the group consisting of phosphorothioate analogues, N3'→P5' phosphoroamidate analogues and analogues with conformationally locked sugar rings.
